

Competitors

Research mainly included youtube videos and official blog posts

01 Snowflake

Clearer view, something our clients were requesting too.

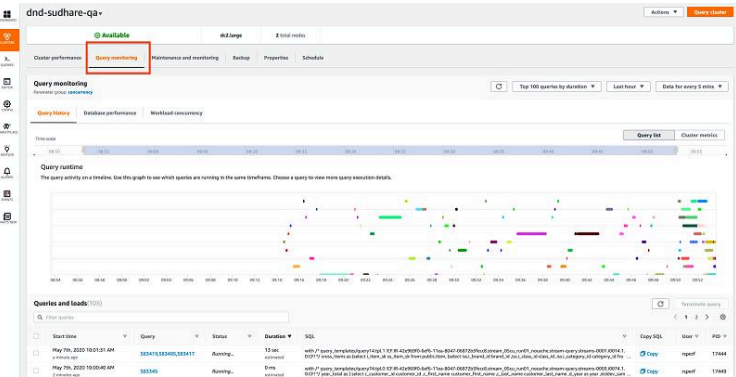

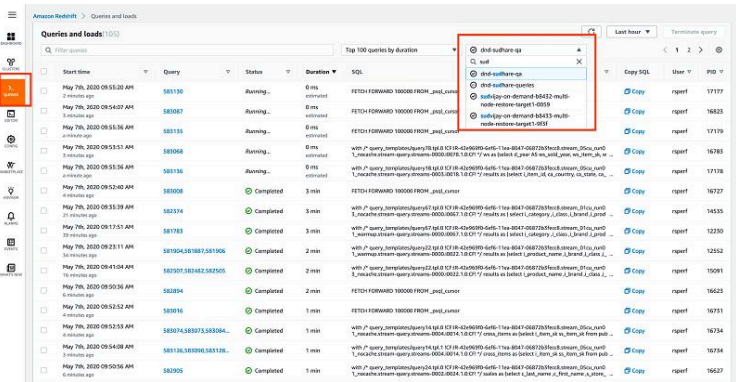

Key Insights

Managing primary cluster is a priority

- Teradata infrastructure provides a common primary cluster for all departments

02 AWS Redshift

Different places in IA to show queries

No early signals before over-utilization

- A badly written tactical query might consume significant chunk of compute resources. A gap b/w reactive and preventive monitoring.

03 Databricks
