[Linkedin](#) 

Senior Product Designer with 7+ years building scalable SaaS and enterprise platforms. Driven measurable impact through research-led design resulting +50% lead conversion for Pyro.ai's first client and ~30% growth in user adoption (NSM) at Teradata. Experienced in designing for diverse users from tech-savvy database admins to non-tech elderly users, while simplifying complex workflows at scale.

EXPERIENCE

Lead UX Designer, EverNorth(The Cigna Group)

August 2025 - July 2026

- Part of the design team that create and manages design system. Contributed to design components with atomic design philosophy and maintaining the design system architecture including modes, tokens etc.,
- Provided UX design support across products in multiple lines of business.

Freelance Designer, Pyro.ai

August 2025 - July 2026

- Ran on-site ethnographic research. Designed CRM flow for Praja, the 1st client for Pyro. Total conversion of leads increased by 50%.

Product Designer, InvoiceCloud

March 2025 - August 2025

- Designed self service flows for non-tech elderly clients. Which increased conversion rate via emails and reduced customer support volume for us.
- Contributed to design system for cross-platform consistency.

Senior Product Designer, Teradata

May 2023 - December 2024

- Owned Observability end-to-end: query monitoring dashboards, report generation, alerting, interaction-rich interfaces at scale. Improved the NSM by ~30% with the new design for 'Query Monitoring' feature.
- Modernized legacy tools using heuristic evaluation, redesigned task flows resulting in reduced time-to-action.

UX Associate, JP Morgan Chase

October 2021 - May 2023

- Designed for internal Tools shipped a data-rich dashboards, for regulatory and governance tools. Led research, flows, component specifications, and delivery.
- Led accessibility across 6 internal products at scale; established WCAG review process.

UX Designer II, Oracle

May 2021 - October 2021

- Applied Oracle's Redwood design system to Primavera Unifier adapted its visual and structural language to the product. Created evidence-based guidelines that scaled across the team.
- Redesigned 3 features in Primavera unifier across cashflow, portfolio, and Activity management to surface insights from unused data. All shipped. 3.75% sales lift for cash flow. Promoted after this contribution.

UI/UX Designer, Scry.ai

June 2018 - April 2019

- End-to-end ownership of a B2C social platform for cancer patients. Redesigned public website (sales-cantered) and built full brand identity.

EDUCATION

Bachelors in Design, IIT Guwahati

June 2014 - May 2018

SKILLS

Design

User research, interaction design, journey mapping, information architecture, wireframes, A/B testing, visual design, usability testing, design systems, heuristic evaluation, Figma prototyping, DB-connected prototypes (Supabase),

AI (Still Learning)

Prompt engineering & eval, agent/tool contracts, RAG patterns, interactions for probabilistic systems, human-in-the-loop escalation.

Tools

Figma (+ MCP), Framer, Miro, Adobe Suite, VS Code, V0, Lovable, HTML/CSS, SQL, DBMS Basics, Cursor. Learning JavaScript (and React).

Miscellaneous

Agile, Scrum

ADDITIONAL

AI Project (On Going)

'Personal gym trainer' application with help of AI tools, where I was able to develop(using VS Code) a basic application with real APIs(Groq, Open AI) and Realistic data in the back-end.

Teaching (Volunteer)

Designers Institute (2021-23). 4 cohorts for 28 days each. From research to portfolio mentorship.
